## NIHONKAI MATHEMATICAL JOURNAL

Vol. 20, No. 2 (2009)

## Contents

Byung Keun SOHN: Bessel potential spaces in Beurling's distributions 73
Tetsu Toyoda: Continuity of a certain invariant of a measure on a CAT(0) space
Ayhan Esi: Strongly generalized difference $[V^{\lambda}, \Delta^{m}, p]$ -summable sequence spaces defined by a sequence of moduli
Tadasuke Yasumura and Hiro-o Tokunaga: Non-Galois triple covering of $\mathbb{P}^2$ branched along quintic curves and their cubic equations 109
Takahiko Nakazi and Michio Seto: Common invariant subspaces of two doubly commuting operators on $\ell^2 \otimes \mathbb{C}^2$
Yasuhide Miura: A note on the Radon-Nikodym type theorem for operators on self-dual cones
Kei Ji Izuchi and Masatoshi Naito: Equivalence classes of mixed invariant subspaces over the bidisk
