

# NIHONKAI MATHEMATICAL JOURNAL

Vol. 25, No. 2 (2014)

## Contents

Shuhei KUWAHARA: Reducing subspaces of weighted Hardy spaces on polydisks .....	77
Takuya HOSOKAWA and Michio SETO: Some remarks on operator equation $C_\varphi = C_\psi X$ .....	85
Mehmet Zeki SARIKAYA and Hatice YALDIZ: On generalized Hermite-Hadamard type integral inequalities involving Riemann-Liouville fractional integrals .....	93
Hideo KOJIMA: Normal log canonical del Pezzo surfaces of rank one with unique singular points .....	105
Kouki TANIYAMA: Discontinuous maps whose iterations are continuous .....	119
Mayumi HOJO and Wataru TAKAHASHI: Generalized split feasibility problem governed by widely more generalized hybrid mappings in Hilbert spaces .....	127
Tatsuya NOGAWA: Uniqueness of the extension of isometries on the unit spheres in normed linear spaces .....	147
Hiroyasu MIZUGUCHI: The Dunkl-Williams constant of symmetric octagonal norms on $\mathbb{R}^2$ II .....	151
